## THERMOMETER BASIC

deulstream

R1150.00 ea  
ex vat

CODE: HT810D

### Measuring temperature Range:

- Body: 34.5 – 43.4°C
- Surface: 0-100°C

### Description:

- Multifunctional: not only can measure the temperature of the human body (forehead), but also can measure the surface of objects, such as milk, food, refrigerator or other household items.
- Non-contact type: temperature can be detected within a measuring distance of 5 CM (2 inches), which is healthier and more convenient.
- You can easily reflect the doctor's temperature changes for diagnosis.
- Accuracy: 1 second measurement time and accuracy (+ 0.2C (0.4 degrees Fahrenheit)).
- The digital infrared thermometer measures temperature safely and accurately.
- Suitable for indoor and outdoor use, suitable for various applications including cooking and fever check.
- Non-contact infrared forehead digital thermometer is equipped with a large liquid display, which can be used for home measurement.

### Features

- Material: ABS
- Mode: Handheld
- Weight: 110gram
- Speed: 0.5s
- Battery: 2 x AA (included)
- Colour-coded guidance to let you know whenever the person has a fever or not easily.
- Automatic shut-down: after 15sec without use.

## THERMOMETER PROFF

CODE: HT815D

### Measuring temperature Range:

- Body: 34.5 – 43.4°C
- Surface: 0-100°C

### Description

- The forehead professional thermometer is designed with high-quality detector inside to let you take an accurate temperature in just 0.5s.
- The non-contact design allows hygienic and convenient measurement, without touching anybody, which is much safer during the flu season.

### Features include

- Highly-responsive detector for accurate and fast results
- Non-contact design to reduce the chance of catching the infectious materials
- Color-coded guidance to let you know whenever the person has a fever or not easily.
- 34 set memory records to notice you the temperature fluctuations.
- Suitable for household, public and personal use.

### Details

Product name : contactless thermometer  
Type: Non-contact type  
Display Type: Digital  
Speed: 0.5s  
Accuracy: +/-0.3°C  
Memory records: 34 set

## THERMAL IMAGING

R6100.00 ea  
ex vat

CODE: HTG03

### Measuring temperature Range:

- -30° to 650° C

### Features

- 128 x 128 Pixels Thermal IR camera
- UV refrigerant detection
- 30:1 distance to spot ratio
- Bright flashlight
- Circular laser
- 1.2m Drop proof

### Details

- Display: 1.77" Colour TFT with 128 (H) x 160 (V) pixels
- Accuracy: (Calibration geometry with ambient temperature 23°C ±2°C): ≥0°C: ±1.5°C or ±1.5°C of reading, whichever is greater
- Response Time (95%) < 125ms (8Hz)
- Spectral Response 8 to 14µm
- Emissivity 0.10 to 1.00
- Temperature Coefficient ±0.1°C/°C or ±0.1%
- Measurement Resolution 0.1°
- Field of View (H x W) 33° x 33°
- Thermal Imaging Sensitivity 150mK
- Colour Palettes 3 (Grey Scale, Hot Iron and Rainbow)
- Save Image Format Bitmap (BMP) Image with Temperature and Emissivity
